

'Start with a subject' posters

Teacher Notes

These resources have been designed by the Careerpivot Team on behalf of the Next Steps South West Uni Connect that works with schools across Cornwall, Devon and Somerset. Although the information regarding job growth has been collated from future Labour Market Information from this region, they will also be relevant in many other regions of the SW and of the UK.

The Resources:

An A3 set of 21 subject posters to print in school

A set of 21 subject posters in an interactive PDF with clickable links to key, additional information on Careerpivot

How a school/college could use the resources:

The A3, print-in-school subject posters can be displayed in the relevant subject classrooms, which will inspire students to see where the subject could lead in the future, and will also support Gatsby 4: Linking curriculum with careers.

The PDF versions of the posters could also be used by subject teachers in lessons to click through to additional information on the Careerpivot, one-stop careers platform, which will give more details of some of the pathways or jobs students could go onto, from that subject.

The PDF posters could also be uploaded to a school/college's own website so that students can explore the links to the additional information themselves, or be shared with parents, perhaps through newsletters with a different subject shown in each newsletter.

Additional resources for subject teachers:

Careerpilot also offers additional resources to support KS4 and KS5 subject teachers in linking their subject with careers, which can be found here

www.careerpilot.org.uk/adviser-zone/resources-for-subject-teachers-gatsby-benchmark-4

If you already have an admin password for Careerpivot these resources are in the Adviser Zone. If you require an admin password then please contact careerpivot@bath.ac.uk
